E C LARIDON

Company Profile

Our Background

The E.C. Laridon heritage originated in saw mills of early Basotho land, known today as Lesotho under the company founder Emile Constance Laridon. The company established itself in South Africa in 1966. Since then the name E.C.Laridon has been associated with quality and craftsmanship that is unrivalled on the African continent. It is thanks to this Quality of work that our name now graces the furniture of labs all over African shores and beyond. We pride ourselves in our service and our work, and we are confident you will be more than happy with our product.

Our Product

The standard range of laboratory furniture is manufactured in modular form, with suspended unitised cabinets hung from an epoxy coated metal support framework. These units are the basis from which we adapt our products for the customers needs. The finished product is not only practical, it meets the standard of modern day trends and aesthetics.

Our Mission

Providing the best prices accompanied by the best service in the industry. Being the best and bringing the best to you is our relentless pursuit. In doing so we strive to grow from strength to strength and thus maintaining our position of being one of the leading laboratory Furniture manufacturers on the African Continent.

To pursue an aggressive, ongoing research and design program thus insuring our future as a leader in the worldwide laboratory manufacture sector. To provide the highest standards of service available through our highly trained field representatives and customer service personnel. Our employees strive to serve the customer with the highest level of technical knowledge in the industry. To endorse the use of environmentally friendly products and develop innovative and flexible solutions to bring about change. This mission statement reflects our proud past and our desire for the future. This is the mantra that drives us in everything that we do.

Our Customers

EC LARIDON is one of the South Africa's longest established and leading specialists in the design, manufacture and installation of laboratory furniture, fume cupboards and associated services. We can supply everything from a single workstation or fume cupboard to a complete suite of state of the art research laboratories. Over the years, we've designed and manufactured laboratories to world standards and design their facilities for maximum return on investment and great adaptability to change. The Process

From one on one meetings conceptualizing the design to final laboratory installation, we are your one stop source for lab design services. Our trained team will guide you through the birth of your new laboratory, or provide options for your renovation. No matter what size or type of project you have, we can meet your laboratory design needs, utilizing advanced CAD software producing detailed drawings. Let us help you meet your laboratory needs today.

CAD design and 3D Rendering

In-house manufacturing & Installation

Our recently extended 2900 square meter factory is equipped with modern machinery and a skilled workforce. We manufacture almost every part of our products ourselves, which enables us to maintain a high level of quality control and design flexibility.

The Functional Laboratory

Our skilled factory craftsmen and installers work with the latest machinery and high quality materials to create laboratories that are comfortable, practical, robust and long lasting. We have installed our furniture at many of the country's leading universities, hospitals, research institutions and commercial laboratories. Quality control extends from research and development through engineering, manufacturing, shipment, delivery and customer feedback.

After-sale service

Our after-sales service is founded on 5 essential pillars intended to satisfy your requirements and ensure the durability of our product:

- 1) Technical services:** on-site assistance is provided if necessary. Our technicians will visit your premises whenever you require should you experience problems with any of our products.
- 2) Preventive and curative maintenance:** we provide preventive and curative maintenance to ensure that your equipment is in good working order. We also provide maintenance contracts which enable us to plan the preventive operations and satisfy your demands.
- 3) Telephonic contact:** After-sales personnel are on hand during working hours so that we can satisfy your demands as quickly and satisfactorily as possible.
- 4) Spare parts:** we undertake to provide spare parts as quickly as possible.
- 5) Training:** We can provide training to our customers relating any of the products we supply from recommended safety guidelines, to the operation of complex products such as fume cupboards, scrubbers and neutralization systems.

For more information on the Laboratory furniture range, or information on the many other laboratory work surfaces we supply

Please contact us at: (email) info@eclaridon.com or (tel.) +27 (011) 917 8670

We will tailor fit the correct layout and work surface to the application you need.
