## 2

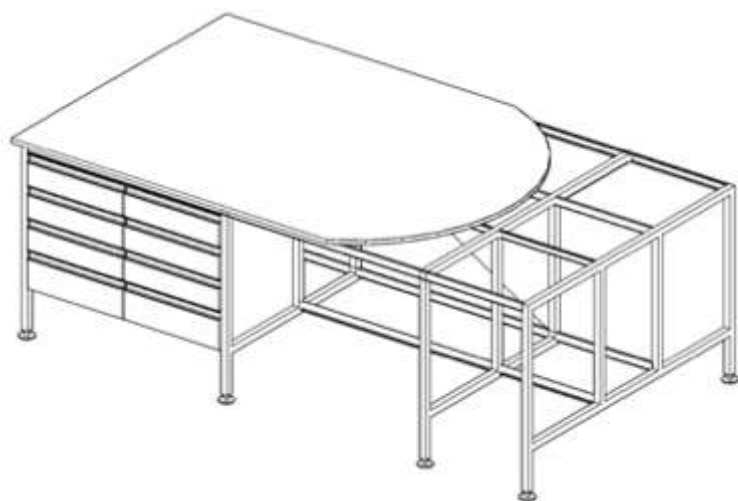

**Modular Epoxy Powder Coated  
Steel Frame system**

**H-Frame System  
C-Frame System  
Cantilever System**

Frames are manufactured from epoxy coated steel. The steel sections are chosen to provide a robust frame for the size of bench specified. The frames can be finished in a range of colours. We recommend the textured (orange peel effect) finishes as they are tougher and more scratch resistant. All tables are fitted with height adjustable feet to aid levelling on uneven floors. Options such as low level shelves and cupboard/drawer units may be fitted to the table.

### Mobile Tables

The addition of lockable castors can enhance layout flexibility, or may be used where analytical equipment needs regular access to the rear for servicing.

## FRAMEWORK COLOUR OPTIONS

The RAL colour chart is used as a guideline for EC LARIDON stock colours available for cupboard handles and metal frames. The accuracy of the colours displayed may vary slightly depending on your monitor settings. Other colours are available to order but may incur an additional charge. All finishes are smooth unless stated.
